

Announcement: If you are new, checkout the onboarding document for how to set up the environment

Heads Up: You can ignore all the files that end with .sh or .nix, they are used in order to run the server

The Counter

Features

- Keep track of how many times our friend meets other people
- Keep track of cool events happening on campus
- Keep track of books and movies for book club and movie nights
- Keep track of how late everyone is to the 8am class
- Plan events to the city and other locations instead of spreadsheets

Setup

To install dependencies, run

```
pip install -e .
```

To run application, run
